KNOWLEDGE IS POWER

(A Constituent Institute of Manipal University)

VI SEMESTER B.TECH (COMPUTER SCIENCE AND ENGINEERING) MAKE-UPP EXAMINATION, JULY 2016

SUBJECT: ADVANCED COMPUTER NETWORKS [CSE 350]
PROGRAM ELECTIVE
REVISED CREDIT SYSTEM

Time: 3 Hours MAX. MARKS: 50

❖ Answer **ANY FIVE FULL** questions.

Instructions to Candidates:

Missing data, if any, may be suitably assumed. 1.A. Explain in brief the types of layer-2 roaming in wireless networks. 4 1.B. With an illustration, describe Spanning Tree Protocol. 6 2A. What are ACL(Access Control Lists)? Explain in brief the two different types of ACL's. 5 2B. Explain why VTP(VLAN Trunking Protocol) is needed and also about the modes of the 5 VTP. 4 3A. Explain the DNS-round robin method of load balancing with respect to data center network architecture design. Mention its disadvantages. 3B What do you mean by virtual hosting? Explain in brief about any three ways of virtual 6 hosting? Describe the different components of virtual machine with respect to virtualization. 4A. 6 4B. Explain in brief how virtualization leads to business continuity. 4 2 5A. List the essential characteristics of cloud computing. 5B. What are the two metrics used in Disaster Recovery Plan? Define them. 3 5C. Explain Extensible authentication protocol-Transport Layer Security (EAP-TLS) used in wireless environment with a neat diagram. 5 6A. Explain in brief the RTP (Real-time Transport Protocol) with its frame format. 6B. Explain in brief the following terms with respect VOIP. 5 d. Voice activity detection a. Jitter e. DTMF(Dual Tone Multi-frequency) b. Echo c. PSTN numbering plan.
