

[illegible]

A Constituent Institution of Mangalore University

**FIRST SEMESTER M C A**

**END SEMESTER EXAMINATIONS, NOV/DEC- 2017**

SUBJECT: COMPUTATIONAL MATHEMATICS [MAT-4150]

Date of Exam: 16-11-2017

Time: 3 Hours

MAX. MARKS: 50

**Instructions to Candidates:**

- ❖ Answer All the questions.
- ❖ Missing data may be suitable assumed.

- ❖ Answer All the questions.
- ❖ Missing data may be suitable assumed.

<b>1A.</b>	Show that the set $B = \{2, 4, 6, 8; x \bmod 10\}$ is an abelian group	<b>3</b>
<b>1B.</b>	From 8 positive and 6 negative integers, 4 integers are chosen at random and are multiplied. i) What is the probability that the product is positive? ii) What is the probability that the product is negative?	<b>3</b>
<b>1C.</b>	Test for consistency and solve: $x + y + z = 6$ , $x - y + 2z = 5$ , $3x + y + z = 8$	<b>4</b>
<b>2A.</b>	Show that $H = \{1, 2, 4\}$ is a sub group of $G = \{1, 2, 3, 4, 5, 6\}$ under multiplication modulo 7.	<b>3</b>
<b>2B.</b>	If A and B are any two events of sample space S which are not mutually exclusive events then prove that $P(A \cup B) = P(A) + P(B) - P(A \cap B)$	<b>3</b>
<b>2C.</b>	Derive an expression for mean and standard deviation of Poisson distribution.	<b>4</b>
<b>3A.</b>	2% of the fuses manufactured by a firm are found to be defective. Find the probability that a box containing 200 fuses contains i) No defective fuses ii) at least one defective fuse iii) exactly 3 defective fuses.	<b>3</b>
<b>3B.</b>	Define planar graph. If G is a connected planar graph with V, E, R are the number of vertices, edges and regions respectively then prove that $ V  -  E  +  R  = 2$	<b>3</b>

Reg. No.

# MANIPAL INSTITUTE OF TECHNOLOGY

MANIPAL

A Constituent Institution of Manipal University

3C.	<p>Define the following</p> <p>i) Complete graph &amp; give an example of complete graph with 5 vertices.</p> <p>ii) Edge connectivity and vertex connectivity.</p> <p>iii) Complete bipartite graph and give an example of <math>K_{3,3}</math> and <math>K_{3,6}</math></p> <p>iii) Give an example of Hamiltonian graph but not an Eulerian graph.</p>	4
4A.	<p>The probability density function of a discrete random variable X is given by</p> $f(x) = \begin{cases} Cx^2, & 0 < x < 3 \\ 0, & \text{otherwise} \end{cases}$ <p>i) Find the constant C</p> <p>ii) Compute <math>P(1 &lt; x &lt; 2)</math></p> <p>iii) Find the mean of X</p>	3
4B.	<p>In a test on electric bulbs, it was found that the life time of a particular brand was distributed normally with an average life of 2000 hrs &amp; S.D of 60 hours. If a firm purchases 2500 bulbs. Find the number of bulbs that are likely to last for i) more than 2000 hrs ii) less than 1950 hrs iii) between 1900 to 2100 hrs.</p>	3
4C.	<p>A fair coin is tossed three times the two random variables X and Y defined as follows, X = 0 or 1 according as head or tail occurs on the first toss. Y denote the total number of heads. Determine the following i) Marginal distributions of X and Y ii) Joint distributions of X and Y iii) E(X) and E(Y)</p>	4
5A.	<p>Reduce the quadratic form <math>3x^2 - 2y^2 - z^2 + 12yz + 8zx - 4xy</math> into the Canonical form by an orthogonal reduction and indicate the nature. And also find the following i) rank ii) index iii) signature of the canonical form.</p>	5
5B.	<p>Find the modal and spectral matrices of <math>A = \begin{bmatrix} 1 &amp; 0 &amp; 0 \\ 0 &amp; 3 &amp; -1 \\ 0 &amp; -1 &amp; 3 \end{bmatrix}</math></p>	5
